

Fellowship Training Committee
Introduction Video Guidelines for
Micrographic Surgery & Dermatologic Oncology (MSDO) Fellowship Applicants
developed by Melissa Pugliano-Mauro, MD, FACMS (May 2023)

NOTE:

- The guidelines are to be implemented for accepted virtual interview applicants
- The **introduction video** is an **optional** application component
- The objective is so applicants only create **one** video to submit to all interested fellowship programs

Prior to your interview, submit a video introducing yourself. This video should be brief (*4 minutes or less*). It should include an introduction of yourself, your interest in an MSDO fellowship, and your relevant experiences and qualifications. You may also consider highlighting any specific goals or achievements that make you a strong applicant as well as anything that you might want to share to help us get to know you.
